FEATURES

Create your own professional content in no-time

Creating your own signage advertisements with iiSignage is easy and fast. You can use one of the available free templates to build your advertisements or you can create and design your own advertisements from scratch.

It is also possible, when you are working with a creative agency, to import advertisements or custom designs which you can edit yourself in iiSignage.

Be creative and stand out

Whether you are using one of the templates or creating your own designs, it is possible to add rich-content such as video's, image slider effects or rolling text bars to your advertisements for maximum impact.

It is even possible to use web-widgets to display real-time information such as a weather report, in your advertisements.

Schedule, publish and manage your content on time and across devices

Digital Signage is more than just creating visually attractive content. It is also about making sure your messages are delivered on time to the right audience. iiSignage allows you to select the best time and place to show your content.

Displays can be added to separate groups – up to 10 - and each group can have its own playlist and hourly schedule; allowing you to tailor your messages per location, device and time.
